MULTI-TURN

— TIMBER STAIRCASES —

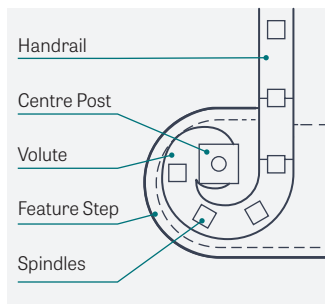

HANDRAIL VOLUTES

A TRADITIONAL HANDRAIL FEATURE

VOLUTES BRING ELEGANCE AND CLASS TO YOUR HALLWAY

THE MULTI-TURN VOLUTE IS DESIGNED TO SAVE TIME ON SITE:

- They are pre-jointed onto the handrail saving labour on site
- The feature step is pocketed to take the spindles
- The centre post is dry fitted into the feature step which has a solid base fitted underneath to provide extra strength
- An option for extra strength is to have a solid metal centre post

THE CHOICE OF VOLUTE

The main choice is between a wreathed volute of a standard flat volute. The main advantage of having a wreathed volute is that it finishes lower on the feature step than a standard flat volute would, please see the diagram on the right.

Wreathed Volute

Special Large Wreathed Volute

Standard Flat Volute

Hazeley Road, Twyford, Winchester, Hampshire, SO21 1QA.
